Environmental Protection Agency
Administrator William K. Reilly
401 M. Street, S. W.
Washington, D.C. 20460

Dear Mr. Reilly,

I just received some information a new fuel additive call HiTec 3000 made by the Ethyl Corporation.

In reading the pamphlet and all its data, I feel that this new product should be in every single gallon of American gasoline. Our air pollution problems are not getting better and I for one would feel better knowing I'm using such a product.

Do you have any idea when this product will be allowed to be used in America and how many Oil companies will be using such a product.

I hope that the EPA will grant permission to let this product into our market, so that our air pollution problems can start improving.

Thank for taking time out of your busy schedule to read my letter and much luck and success to you and your very important agency.

Sincerely,

Steve Lopez
